Clarification of Designated Dog Walking Areas

These areas have been established in response to requests from residents who are dog owners as well as non-dog owners.

In an effort to save our grass and keep our landscaping costs under control, we have designated 3 dog walking areas for your pets to use.

The dog walking areas are:

- Grass area surrounded by parking spaces between the 100 and 300 garages. ALL THE WAY TO THE REAR OF THE GRASS AREA.
- The grass area surrounded by parking spaces between the 300 and 500 building garages. ALL THE WAY TO THE REAR OF THE GRASS AREA.
- Grass area surrounded by parking spaces between the 800 and 700 building garages. ALL THE WAY TO THE REAR OF THE GRASS AREA.

As always, the dog owners are still required to pick-up after their pets in these areas.

This does not mean that you cannot walk your dog throughout the complex. It is just an area where we are asking that you try to train your dog to do their business or, as always, use the wooded area around the complex.

We understand that when walking your dogs they may go more often and that is fine. We are just trying to stop the constant use of the grass areas in front of or behind the buildings as the grass is dying and our cost for reseeding the lawn is growing.

We have also been informed that a mixture of water with baking soda or vinegar eliminates the odor that attracts other dogs to use the same spot. This will also help to keep other dogs from using an area around your unit if you feel inclined to use it to help eliminate the grass destruction.

The Board of Directors thanks everyone in advance for their cooperation.
